**NEW PRODUCT - in stock**  
**ChangingTimes**  
**Dry Applicator**

Maximizing your yield starts by treating your seed. To obtain the best use of your treatments, you need to treat the seed as close to planting as possible. The CT Dry Powder Applicator does just that - it can be used in-field or while filling the seed tender. Our CT Dry Powder Applicator will meter talc, inoculants, graphite or any dry product evenly and accurately. **Many mounting options. Built tough to last!**

## Gen 2 Algae Prevention Tanks by Free Form Plastics

Algae growth and contamination have always been problems with water transport tanks. Black tanks have typically been used to overcome this problem, but because of the heat absorption of black the inherent strength of the tank is compromised making it difficult to securely fasten the tank for transport. The design staff at Free Form Plastics has patented an innovative tank which eliminates algae growth without sacrificing the tank's structural integrity. It appears to be a normal white tank but the inside is black to block UV rays.

- Available in 3 Styles:**
- Vertical Flat Bottom: 1500, 1680, 1800, 2100, 2400, 3000 US gallon
  - Vertical Cone Bottom: 1500, 1680, 1800, 2400, 3000 US gallon
  - Low Profile: 1380, 1620, 2340, 3180, 3900 US gallon

The Low Profile tanks have extreme ribbing and heavy-duty design to eliminate the need for steel support hoops. 3" bulkhead fitting is standard and comes with an interior siphon tube for better drainage.

In stock in heavy-duty Gen2 (white exterior, black interior) versions. The 3900 gallon is modular in design. The 1380, 1620, 2340, and 3180 gallon are a 1-piece design. Large ribs act as baffles reducing the amount of sloshing and domed ends add strength and also reduce sloshing. A large manhole for easy access if required and comes complete with unload and load hooks.

## CHEMBINE by Freeform Plastics 75 Gallon Capacity

—This new product is a cutting-edge way of mixing your dry and liquid chemicals for your agricultural needs. The **CHEMBINE** incorporates all the features of a typical chemical mixer plus adds some user-friendly features while dramatically improving in the following areas:  
New and innovative knife block design provides a more efficiently shaped cut requiring less effort, faster & more complete drainage/rinsing as well as easier removal of the jugs. Increased agitation - Easy rinse and drain - Improved visibility with all hoses having clear sidewalls. With or without 3" Honda pump.
